

**Bryan C. Stubbs**

*Senior eDiscovery Consultant –Pacific Southwest*

Cell: 213-219-0724 | Office: 213-489-1700

[Bryan.Stubbs@Ricoh-USA.com](mailto:Bryan.Stubbs@Ricoh-USA.com)

Mr. Stubbs advises attorneys, law firms, and corporations on legal strategies in the preservation, collection, and production of electronic information during the litigation process. He also consults corporations how to prepare for litigation through development of appropriate document retention programs and implementation of litigation holds.

As a Senior Consultant of eDiscovery for the North and Southwest, Mr. Stubbs' focus is on continuing to evolve Ricoh America's Corporation's expansion of solutions into the legal community. He evaluates the functional needs of corporate counsel, law firms and IT departments for technical advancements to improve the quality of the end user experience.

**EXPERIENCE**

He began his technical career working with an affiliate to internet service provider, AOL when their business model was still considered a "Closed Network". Experience with wide area networks led him to network infrastructure design, implementation and management. He then acted as national Director of Information Technology of a globally based international freight forwarder/Customs house broker. The network he designed, built and managed acted as a beta test facility for Nortel Networks next generation enterprise level equipment. He also authored the corporate email and data policy, procedures and retention manuals.

Following a career in information technology, he nationally represented a leading bio-mimetic systems technology on the forefront of predictive coding and meaning based computing, specializing in large document repositories. Since then he has represented the world's premier data management, governance, electronic discovery and retention technologies.

Mr. Stubbs specialties include information governance, ESI forensics and collection, preservation, spoliation prevention, and chain-of-custody control; Preparing e-discovery plans, data maps and budgets; Consulting in designing case-specific databases; educating and training on complex database review; Technology Assisted Review developing predictive coding models for expedited, uniform and accurate document review. He is a subject matter expert with regard to the Information Governance, Electronic Discovery and Computer Assisted Review Reference Models.

Mr. Stubbs has experience consulting on large litigation matters in state and federal courts. He has worked on cases involving Medtronic, Blue Cross/Blue Shield, AT&T, Cisco Systems, Wells Fargo as well as the Department of Homeland Security, FBI and CIA (surrounding September 11<sup>th</sup> investigations).

He is also an accredited CLE instructor in several states; guest speaker at several chapters of ARMA (Archive and Records Management Association) and the TSWG (Technical Support Working Group). He has been very fortunate during his career to work with the majority of the AM Law 250 and Fortune 500.
