

COALSP

11th Annual eDiscovery Summit

Speaker Panel

Jonathan M. Redgrave, Partner, Redgrave LLP

Jonathan has extensive experience in all areas of complex litigation in both state and federal courts and focuses his practice in the areas of information law, which include electronic discovery, records and information management, and data protection and privacy issues. He has authored, co-authored, and edited numerous publications, including serving as Editor-in-Chief of "The Sedona Principles®," and speaks around the world on topics including cross-border discovery, information governance, privacy, data security, and emerging technologies.

Tom O'Connor, Consultant, The Gulf Coast Legal Technology Center

Tom O'Connor is a nationally known consultant, speaker and writer in computerized litigation support systems and complex litigation matters. He has been appointed as a technical consultant by various federal and state courts on cases dealing with large amounts of electronic evidence and specializes in negotiating ESI exchange protocols. Tom frequently lectures about legal technology, teaches CLE courses nationwide, publishes a weekly blog, and has written numerous articles and books, most recently "Ediscovery for Small Cases" from the ABA.

Deanna Blomquist, Sr. Manager of eDiscovery & Information Governance, DISH

Deanna provides strategic leadership and direction for the delivery of technology and professional services in support of DISH's eDiscovery and Information Governance program. She has been in the eDiscovery and Litigation Support industry for eleven years, having served as a Director for the delivery of litigation support services for three AmLaw 75 law firms prior to her role at DISH.

Matthew Clark, Litigation Support Supervisor, Colorado Attorney General's Office

Matthew has over 15 years of experience in e-discovery within the legal industry, focusing on cases involving sizeable and complex data sets. He is currently the Litigation Support Supervisor for the office of the Colorado Attorney General. Previously, he held positions as Litigation Support Project Manager and Litigation Support Analyst/IT Paralegal at Hogan Lovells, US LLP and Socha Perczak Setter & Anderson, respectively. Matthew applies application development, data processing and validation management, and workflow analysis to identify concerns, evaluate data, and prepare a comprehensive final product.

Emily Rugg, Legal Project Manager, Polsinelli

Emily is a legal project manager for the Intellectual Property Department at Polsinelli. She has spent nearly 7 years as an e-discovery project manager, including time at both a large international law firm and an e-discovery vendor. Emily is a JD, certified PMP and RCA with experience managing projects large and small.

Steve Watson, Chief Technology Officer / Principal Investigator, VTO

Steve is a founder of VTO, a technology think tank focused on the most challenging areas of data preservation, data recovery and digital forensics. He is also the Principal Investigator for two R&D projects funded by the U.S. Homeland Security, Science & Technology Directorate on Drone Forensics and Damaged Mobile Devices Forensics. With nearly two decades of experience in IT, information security, and investigations, he is an active digital forensic researcher working in data recovery from emerging technologies and damaged devices. Watson chairs two Federal committees related to digital evidence (SWGDE-Forensics Committee and NIST-OSAC-DMSAC-Digital Evidence Subcommittee-Mobile and Embedded Device Forensics Task Group).
